## **DETAILED ACTION**

### ***Restriction Requirement***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 11-20, drawn to method of treating infectious disease with an ointment composition comprising penem antibiotic, classified in class 514, subclass 192.
  - II. Claims 21-25, drawn to method of increasing the stability of penem antibiotic, classified in class 435, subclass 43.

The inventions are distinct, each from the other because of the following reasons:

The inventions are capable of supporting different patents within the art. Invention I is directed to a method of treating infectious disease with a penem antibiotic. Invention II is directed to a process or method of stabilizing a penem antibiotic.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. A telephone call was made to Arthur R. Crawford on 07/24/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1615

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
